1. Overview .....	2
2. Release Information .....	3
3. Contact Information .....	6

For users of PC\*MILER|Tolls\*, updates to ALK's North American Toll Data ensure that the most recent toll costs published by tolling authorities are reported in route calculations. Accessing the toll database allows users to calculate and refine a route's reported toll costs, factoring in:

- Vehicle weight (for less than 9,000 lbs. and up to 132,000 lbs.)
- Vehicle axle count (for 2-14 axles)
- Vehicle type (heavy vehicle, medium duty vehicle, light vehicle, and automobile - based on the selected Vehicle Dimensions)
- Trailer count (single or multiple trailer)
- Transaction type (cash or discount program)
- Time of day travel (specify a current date and/or time of day, future date or past date)
- Currency (specify either USD or CAD, a convenient current converter is also provided)

Depending on the dimensions and toll reporting options selected, the toll cost reported by PC\*MILER will fluctuate accordingly.

\*PC\*MILER|Tolls license required.

**NOTE:** Through the use of PC\*MILER's time-based routing features, toll costs can be calculated based on a particular time of day including a current, future or past date (if entered). The information listed in the chart below identifies the rate changes included in the cited releases and indicates when each rate change goes/went into effect. When generating routes, if a specific departure/arrival date/time is chosen, the toll rate that is in effect during that specified time period will be reported. If no departure or arrival date is specified, the time period will be chosen based on the date of the system clock and the most recent rates available for the version.

## Downloading and Installing Updates:

PC\*MILER is equipped with a web-based update tool to facilitate the download and installation of software patches and data updates. To access this feature, open PC\*MILER and select Help, then "Check for Updates" and follow the instructions on the screen. This feature requires an Internet connection. The updates available depend on your License Type\*.

\*If a PC\*MILER product was purchased along with signing up for ALK's Annual Update Program (AUP license purchase), customers are entitled to use PC\*MILER during the term of their agreement as well as to receive data updates when and if available. Otherwise, PC\*MILER is purchased as a Perpetual license. For more information on upgrading a Perpetual license to an AUP license, please contact a PC\*MILER Account Executive at 800-377-6453 ext. 1 or email sales@alk.com.
