Overview

Between version releases, updates and patches are periodically made available as the need arises. These may include corrections to reported errors in the software or data, or access to new data releases (for applicable products and license types¹).

This document provides information on the following release:

Product:	PC*MILER 30	
Update Type:	Map Data Update ^{1,2}	
Date Released:	January 2017	
Data Set Name:	2016 Q4 North America (NA) Map Data Update	
Data Version:	GRD_ALK.NA.2016.04.12.5.1.2	
Supersedes Version/s:	2016 Q3 Map Data Update	Released: October 2016
	2016 Q2 Map Data Update	Released: June 2016

Install options

For users with an applicable license, these install options are available:

- **Installing the full data set** to access all updates included in the Routing and Map Data Update, the ZIP/Postal Code and City Point Data Update, and the SPLC Data Update³ (see sections below for more information).

IMPORTANT NOTE: Installing this map data update won't overwrite the existing map data released with the initial launch of PC*MILER 30, referred to as the "NA - Base" data set. Instead, this update data set – referred to as the "NA - Latest" data set – is installed separately and activated by default in the Map > *Change Data Set* menu. You may want to keep the base data set active or stay up-to-date by using the latest data set. **After installing the update, please go to the Map > *Change Data Set* menu to confirm that the desired map data set is selected.**

Downloading and Installing Updates and Patches

PC*MILER is equipped with a web-based update tool to facilitate the download and installation of software patches and updates. To access this feature, open PC*MILER and select the Help tab > Check for Updates and follow the instructions on the screen. This feature requires an Internet connection.

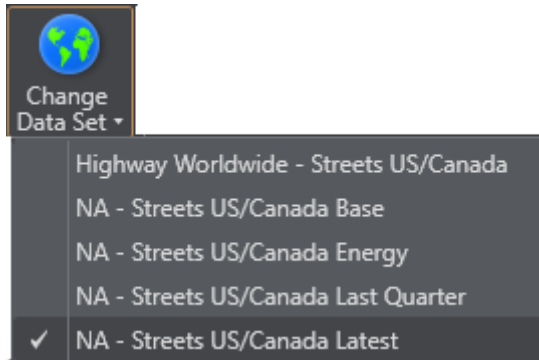

Provided you have an Internet connection and applicable license type, follow the steps below to install the available updates:

1. Close all open instances of PC*MILER and its connectivity products. If a third-party program that accesses any PC*MILER component is running (for example, PC*MILER|Connect or PC*MILER|Mapping), it must be closed before updating.
2. Open PC*MILER and select the Help tab > Windows group > *Check for Updates*. The PC*MILER Updater dialog will open. The Updater first checks for valid license information and then begins checking for available updates.
3. When the search for updates is complete you will see all available updates listed. In the **Download & Install** drop-down menu next to each available update, select either *Download & Install* to download and install right away or *Download* to download now and install at a later time.
4. Note the version number of the updates you will be downloading so you can check if the update installed properly (see Step 7 below).
5. Selecting either option will begin the download process. You will see the progress of the download reflected in a progress bar. If any PC*MILER-related application is open, you will be prompted to close it. After closing the application(s), click **OK** to continue with the download.
6. If you chose *Download and Install*, the InstallShield Wizard will open when the download is finished. Follow the instructions to complete the installation. After installing, you will see the update listed under “Installed Updates” in the Updater window.

If you chose *Download*, when the download is finished the button to the right will now say “Install”. You can complete the installation as described above at any time in the future by opening the Updater window and clicking **Install**.
7. As a last step, check to make sure the update installed properly. Select the Help tab > About group > *About...* and look for the Software Version number under “This Product is Licensed To”. It should match what you downloaded.

Accessing the Update Data Set in PC*MILER

After the update data set is installed, select the Map tab > Utilities group > *Change Data Set* > to change the version of the map data that PC*MILER uses to calculate routes. The currently loaded data set will be displayed in the title bar of the map window, shown at the bottom of each page in any generated reports in Print View, and selected with a checkmark in the *Change Data Set* menu.

For AUP Licensed Users: For PC*MILER (North America only), the options in the drop-down will include the base version data set plus any update versions that have been released since the base version (the “Latest” data set listed), including PC*MILER|Streets U.S. and Canadian street-level data if installed.

NOTE: Applicable licenses required to access the PC*MILER|Worldwide, PC*MILER|Streets and PC*MILER|Energy data sets.

Section 2

North America Standard Routing and Map Data Update²

General Information

Product:	PC*MILER 30
Data Set Name:	2016 Q4 North America (NA) Map Data Update
Data Version:	GRD_ALK.NA.2016.04.12.5.1.2
Change Data Set Menu Option:	After data set is downloaded and installed, in PC*MILER go to Map > <i>Change Data Set</i> menu and select “NA – Streets US/Canada Latest”

Overview

Updates to PC*MILER’s routing and map data ensure users gain access to the most up to date road and street-level network² coverage. Depending on how you are using PC*MILER, you may prefer to remain on the base North American version data set. For example, if you have a contract with a customer that states a specific version of PC*MILER mileage is to be used, it would be best to access the base version data set. For users who are routing vehicles with PC*MILER’s truck-specific directions, or running routes and mileage summaries at the street-level², we recommend accessing the most recent update data set. To access update data sets for routing and mapping, see the section above titled *Accessing the Update Data Set in PC*MILER*.

POI Data Updates

ALK products provide the ability to search, display and route to millions of business points of interest (POIs) verified by Infogroup®. ALK also maintains a unique set of truck-specific POIs including truck stops, intermodal ramps, weigh stations and rest areas. These POIs are located strategically for truck access and provide a safe way for drivers to access businesses most relevant to them.

Coverage & Statistics

The total number of all POIs included in this data set is as follows:

NORTH AMERICA*	8,135,868
----------------	-----------

* Most POI coverage currently limited to U.S. and Canada.

North America ZIP/Postal Code & City Point Data Update

General Information

Product:	PC*MILER 30
Data Set Name:	2016 Q4 North America (NA) Map Data Update
Data Version:	GRD_ALK.NA.2016.04.12.5.1.2
Change Data Set Menu Option:	After data set is downloaded and installed, in PC*MILER go to Map > <i>Change Data Set</i> menu and select “NA – Streets US/Canada Latest”

Overview

ZIP/Postal code data update releases enhance the PC*MILER database with new codes or new acceptable names to an existing code. The following types of ZIP/Postal Codes are included in this release: U.S. ZIP Codes, Mexican Postal Codes and Canadian Postal Codes⁷.

ALK’s North American map and geocoding database includes City Point data at the local, municipal, and state-equivalent level. City Points can be geocoded and either displayed on the map or used in routing scenarios. City Point Data Update releases enhance the database with new cities and/or new acceptable city names.

Coverage & Statistics

ALK maintains an extensive database of city points, ZIP codes, and postal codes in order to provide accurate geocoding in all of its products.

The current coverage of this data is as follows:

COUNTRY	NUMBER OF CITY POINTS	NUMBER OF ZIP/POSTAL CODES
UNITED STATES	190,165	51,132
PUERTO RICO	2,249	205
US VIRGIN ISLANDS	251	26

Overview

Standard Point Location Codes (SPLC) enable the PC*MILER database to generate routes for rating and freight bill auditing. A SPLC provides each point originating freight and each point receiving freight in North America with a unique code number associated with that point’s geographic location. SPLC use two digits to identify State, County and City and three digits to identify Sub-Code. SPLC Data Update releases enhance the database with new codes or new acceptable names to an existing code.

Coverage & Statistics

Currently ALK has 112,634 SPLC in accordance with the National Motor Freight Traffic Association (NMFTA), which owns and maintains this data.
